

Project LDAP

- [New TDS User](#)
- [Server/Application User List \(LDAP authentication\)](#)

New TDS User

By pressing  button it's possible to add new TDS users (not TDS project users) using CSV file with user's emails.

Entering in at least first 2 characters of the user's name TDS portals presents available users from Project User List.

When a user is not available in Project User List, the user needs to add a new user to the current TDS Project at first.

User can use **ADD** Service Account option to add Project Service Account to the current SaaS Service.

User can use button **CANCEL** to cancel adding user to the Project.

Server/Application User List (LDAP authentication)

Server User List includes a list of all current project users including his initials:

- First Name
- Surname
- Username and
- Email (when enabled in the user's profile)
- SaaS last login information

Total user count is shown in Server on top of the list.

It's possible to sort user list ascending or descending using Username, First Name or Last Name.

User filtering using role switches is available (only one role can be selected).

User role can be granted or removed using Role switches (Admin role) by Project Admin user.

The screenshot shows the 'USERS' tab in the tieto DevOps Space interface. The server is identified as 'CentOS' with the configuration 'c7ldap.sprinttesttenant.stage.tdsdev.tieto.com (running - installed)'. The interface includes a sidebar with navigation options like DASHBOARD, SAAS, SERVERS, APPLICATIONS, DETAIL, RESOURCES, USAGE, LOGS, NETWORK, STORAGE, USERS, and BILLING. The main content area shows a list of users with their names, email addresses, and SaaS last login times. Each user entry has a toggle switch to the right, which is currently turned off. The users listed are Jiří Bačovský, Jiří Billig, Buck Bunny, Martin Duží, and Kristýna Gabrielová. The total user count is 21.

Name	Email	SaaS last login	Role
Jiří Bačovský	jiri.bačovsky@tieto.com		admin
Jiří Billig	jiri.billig@tieto.com		
Buck Bunny	borginek@gmail.com		
Martin Duží	martin.duzi@tieto.com		
Kristýna Gabrielová	kristyna.gabrielova@tieto.com		

All Project users have access to Project LDAP Servers and Application by default including Project Service Account.

All Project users including Project Service Account are added to Project LDAP group, so it's not possible to remove a user from an LDAP Server only.

Removing a User from Project means the removal of the user from the Project LDAP group and removal of the user from all Project LDAP Servers.

Anonymous management
