

# TDS 4.x Release Notes archive

## TDS 5 and newer releases

[Release Notes](#)

## TDS 4 release notes

### TDS 4.9

Confluence 7.15.2 released
Gitlab 14.9.5 released
Network/Firewall improvements in TDS portal: <ul style="list-style-type: none"><li>SSH port (22/tcp) is still default port accessible from everywhere on newly deployed servers, but it is not mandatory anymore. It is optional already during server deployment. Firewall is now fully flexible according to your needs.</li><li>New "_common_" security group was introduced in each project/tenant. It is automatically assigned to all project servers, users can define FW rules in that one group instead of defining same rules in all server security groups. It brings you convenience while it fulfils higher security requirements.</li></ul>
TDS in public cloud now supports more flavors which allows better granularity when choosing HW configuration of servers.

### TDS 4.8

CentOS 9 Stream added into store
Gitlab 14.8.5 released
Jira 8.22.1 released
Ubuntu 22.04 LTS added into store
Server order and resize HW configuration improved to be more smooth and understandable

### TDS 4.7

Artifactory 6.23.37 released
Gitlab 14.8.2 released
Portal re-branding to match Tietoevry brand.
Servers deployment and resizing reliability improvements. Flavours improved to offer only relevant options in certain occasions. More flavours is now available thanks to dynamic flavours propagation from infrastructure providers.

### TDS 4.6

Jira 8.20.5 has been released to address CVE-2021-43947 security issue
Last access information about users is now more accurate
Users now can enable or disable MFA + reset their OTP token in user profile. Project admins/owners or customer area admins/owners can enable/disable MFA for project or area. MFA can be also enforced for all users including service accounts, or without them.
Windows 2019 Standard added into store (available upon ticket request)

### TDS 4.5

Added functionality for enabling and reset of OTP token for TDS Multi Factor Authentication (MFA)
Bitbucket, Confluence and Jira plugins updates
Confluence 7.15.0 released
