

Workspaces

Intro

Workspace is organizational unit that contains virtual resources and members.

What do you want to do?

Manage virtual resources

- SaaS
- Applications
- Servers
- Logs
- Firewall
- Storage
- Certificates

Manage users

- Add user permissions
- Invite new users
- Create service account

Something else

- Billing and invoices
- Create new workspace
- Delete workspace
- [Ask support](#)

Create new workspace

You can create new workspace from *Workspaces* screen by clicking  button. Workspace name should be unique in your organization.

You need to choose billing type when creating new project in order to properly calculate billing. If you are not sure, choose *None* and you will be contacted by TDS support before monthly invoices are generated.

Delete workspace

To delete your workspace, [contact TDS support](#). By deleting your workspace, **you will also delete its virtual resources**, including:

- SaaS
- Applications
- Servers
- Certificates
- Service accounts
