

Billing and Invoices

This page is under construction. In the meantime visit old billing page for more information: [Billing](#)

Intro

Invoices are generated monthly at the end of every month. Costs are calculated for every organization and are split between workspaces based on settings and configuration of each application.

Consumption of virtual resources, number of users and licenses affects the total costs.

What do you want to know?

Organization billing

- What do we pay for?
- How are costs shared?
- License costs

Workspace billing

- What do we pay for?
- Virtual resources costs
- Server costs
- License costs
- User costs

Something else

- Billing periods
